

To The FCC;

Ladies and Gentlemen of the FCC; First, freedom of speech and the right to get timely information is as old as our nation. I respectfully request you reject the National Association of Broadcaster's petition 04-160 and continue to support XM Radio's ability to provide programming that I pay for, need, and honestly when it comes to weather and traffic, demand!

No organization should be able to dictate the means by which we get information which directly impacts our safety! That is exactly what the NAB is attempting to do. I for one will not have it.

Thanks for your support. Frank Murtagh, Mesa, Arizona
